PROFILE

Self-driven Computing and Information Systems graduate from Sabaragamuwa University of Sri Lanka with 6 months of professional experience as a Software Engineer Intern at GTS Active (Pvt) Ltd. Skilled in software development, database management, and full-stack web development, with hands-on experience in Vue.js, TypeScript, Spring Boot, Firebase, MySQL, and MERN stack projects. Experienced in Agile development and collaborative team environments, with a strong passion for building efficient software solutions, solving real-world problems, and continuously improving technical and analytical skills.

EDUCATION

BSc (Hons) in Computing & Information Systems
Sabaragamuwa University of Sri Lanka

2023 - present

G.C.E. Advanced Level in Physical Sciences Stream
Kuli/ Bingiriya Sri-Saranankara National College

2021

INTERNSHIP EXPERIENCE

Software Engineer Intern
GTS Active (Pvt) Ltd.
December 2025 – May 2026 | 6 Months

Developed web applications using Vue.js, TypeScript, Spring Boot, Firebase, and MySQL, contributing to systems including POS, HRD Recruitment, LMS, and e-commerce applications.

Built responsive and reusable frontend components, integrated RESTful APIs, and implemented backend functionality using Spring Boot and Firebase.

Worked with Firebase Authentication, Firestore, and MySQL for user authentication and data management, and used Postman for API testing and debugging.

Collaborated in an Agile/Scrum environment, participating in daily meetings, debugging, testing, and code management using Git and GitHub.

PROJECTS

Car Rental Web App – MERN Stack (Individual Project) 🌐
MongoDB | Express.js | React.js | Node.js

Designed and developed a full-stack car rental platform enabling users to browse and book cars, with role-based access for admins to manage vehicles and bookings. Implemented secure authentication, CRUD operations, and image uploads for car listings. Built and optimized an admin dashboard with efficient MongoDB queries and robust image handling to deliver a seamless booking and management experience.

E-Commerce Platform – MERN + Redux (Individual Project) 🌐
MongoDB | Express.js | React.js | Node.js | Redux

Built a dynamic online store with product search, filtering, and sorting to enhance user navigation and shopping experience. Integrated authentication and authorization and implemented Redux for scalable state management across user and admin roles. Designed RESTful APIs and dashboards for managing products, categories, and orders, ensuring seamless performance and an intuitive user interface.

Real-Time Chat Application – MERN + Socket.io (Individual Project) 🌐
MongoDB | Express.js | React.js | Node.js | Socket.io

Built a real-time messaging app featuring JWT authentication and a Socket.io-powered chat system for seamless communication. Designed a responsive React UI optimized for all devices, securely stored messages in MongoDB with an efficient schema design and implemented instant message delivery and user status updates for an engaging chat experience.

WaveWord – Assistive Communication App (Group Project)
React Native | AI/ML | Real-time Processing

Built a mobile app that translates hand signs into speech, featuring real-time video calling for inclusive communication. Integrated AI-based gesture recognition and Firebase for authentication and data storage. Designed an accessible mobile UI and contributed to the WebRTC video call module.
My Contribution: Focused on Firebase integration, UI/UX in React Native, and WebRTC video calling.

MyDocTime – Doctor Appointment Platform (Individual Project)
React.js | Tailwind CSS

Designed a modern, responsive app for doctor and patient profiles with appointment scheduling. Developed reusable React components for scalable UI and consistent design patterns, ensuring smooth navigation, responsiveness across devices, and efficient booking experience for users

Veterinarian Management System (Group Project)
HTML | CSS | PHP | JavaScript

Developed a web-based system for pet registrations, user accounts, and appointment management. Designed intuitive front-end interfaces and implemented back-end data handling with PHP. Worked collaboratively in a team to deliver end-to-end functionality for clinics.
My Contribution: Handled front-end development and supported PHP-based appointment logic.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, PHP
Frontend Technologies: HTML, CSS, React.js, Next.js, Tailwind CSS, Bootstrap
Backend & Frameworks: Node.js, Express.js, Laravel
Databases: MySQL, PostgreSQL, MongoDB
Version Control: Git, GitHub
Tools: Figma, Visual Studio Code, IntelliJ IDEA, Postman, Docker
Concepts: Object-Oriented Programming, Agile Development

SOFT SKILLS

Problem Solving	Adaptability	Communication Skills	Leadership
Critical Thinking	Multitasking	Team Collaboration	Attention to Detail

CERTIFICATES

Full Stack Developer Course- Simplilearn 
React Basic Certificate - Hackerrank 
Java Programming for Beginners-Simplilearn 
Introduction to MERN Stack - Simplilearn 
Software Engineer Intern - HackerRank 
Introduction to Software Testing - Simplilearn 
Agile Manual and Automation Testing - Techcanvass
